

## Edison Stoccaggio Spa

Società a socio unico  
Sede Legale - Foro Buonaparte, 31  
20121 Milano  
Tel. +39 02 6222.1

In order to comply with Commission Regulation (EU) nr 312/2014 of 26 march 2014 and with Snam Rete Gas network code provisions, Edison Stoccaggio communicates to his Clients that starting by 1st October all the information flows to and from SRG, Locational Market G-1 sessions results included, will be operated in compliance with SRG network code. The measure of energy will be calculated using to a GCV @25 °C and scheduling will be transmitted in MWh/d.

As far as the information flows between Clients and Edison Stoccaggio are concerned, as well as the impacts on Escomas, GJ (referred GCV @ 25 °C) will be maintained as measure unit until 31th march 2016 in order to guarantee continuity during the thermal year 2015-2016.

To favorite the operational process regarding daily scheduling for G day and G+1 day, Edison Stoccaggio communicates that, starting 15th October 2015 ( injection campaign concluded,) data for these process will be input in Escomas directly in kWh/d, still remaining the features of these task.

Edison Stoccaggio will consult the modifications to his storage code in order to set the provisions for the new balancing market as well as the new rules for hourly scheduling, as soon the AEEGSI will regulate all those aspects.
