

ESCOMAS PLUS

MFA (Multi Factor Authenticator) set up process

<https://escomas.edison.it/>

Download MFA App

Before diving into the set up details, download the “**Google Authenticator**” app, or third-party equivalent apps, such as “**Microsoft Authenticator**”, on your phone.

Here below the links to download the apps mentioned above for iOS and Android.

Android Apps:

iOS Apps:

[Google Authenticator - App su Google Play](#)

[Google Authenticator su App Store \(apple.com\)](#)

[Microsoft Authenticator - App su Google Play](#)

[Microsoft Authenticator su App Store \(apple.com\)](#)

Set up the MFA

After downloading the app, open the Escomas website page and login with your **Username and Password**:

Check the reCAPTCHA:

login

Non sono un robot

reCAPTCHA

LOG IN

[Have you forgotten your password?](#)

Username

LOG IN

[Have you forgotten your password?](#)

And then click on the “**LOGIN**” button. Once logged in, a pop-up message with a QRcode will appear. Take the Authenticator app previously downloaded and scan it. If it’s not possible to scan the QRcode, enter the serial number directly in the Authenticator app.

Once clicked the “**GO TO QR CODE VERIFICATION**” button, it will appear the pop-up message here below:

Enter the valid six-digit OTP code available on the Authenticator app and click the “**VERIFY OTP CODE**” button.

Enter the 6-digits code from your code generator or third-party app below

Enter the 6-digits code

VERIFY OTP CODE

Scan Qr Code with Google Authenticator or third-party app

Or insert manually serial number (remember to store this code in case you lose your device)
